INTRODUCTION

This publication is composed of selected statistical series taken from the 1951 Decennial Censuses of Distribution, Population and Agriculture, and the annual Census of Industry for 1951.

The tables have been designed to show, on a single page, seventy items, selected from the many hundreds available as being the most useful for those interested in general background data for market research. These items have been shown for various geographical areas ranging from Canada as a whole to places of 5,000 population or over.

Detailed housing and farm statistics, shown in the corresponding report from the 1941 Censuses, have been omitted from the present edition, since they are available in very great detail in regular Census volumes. Information has been shown for places of 5,000 population or over, compared with places of 2,000 and over in 1941, since it was felt that most of those with less than 5,000 population were not too significant in a publication designed to consolidate a mass of information into useable tables. A seventy-item stub, for provinces, counties or census divisions, census metropolitan area cities, and all places of 5,000 population or over, appears to meet the needs as indicated by users of the 1941 edition.

Marketing Data, 1951, is the third release of this nature, similar ones having been compiled from the results of the 1931 and 1941 Censuses. Changes in the geographic presentation are in keeping with the availability of data, e.g. retail store figures for census metropolitan area cities were compiled for the first time in the 1951 Census. Certain figures were not available for all geographic areas, e.g. wholesale and service figures for census metropolitan area cities, and agriculture figures for places of 5,000 population or over.

Four tables relating to retail commodity figures compiled in the 1951 Census of Distribution are presented in the last tables of this publication. They were prepared from commodity analysis of sales reported by a large sample of the total number of retail establishments in operation in 1951.

Complete information for all items is available in Census volumes listed in Appendix A.

Wholesale trade. Final figures from the 1951 Census of Distribution were obtained from Census Volume VIII--Wholesale Trade and Services. The figures cover all types of wholesalers, ranging from wholesalers proper to agents and brokers and manufacturers' sales branches.

Services. Final figures from the 1951 Census of Distribution were obtained from Census Volume VIII--Wholesale Trade and Services. Included in the Services segment of the Census are the following groups:

- Amusement and recreation (theatres, bowling alleys)
- Personal (barber shops, beauty parlours)
- Repair (radio and electric, garages)
- Business (advertising agencies, machine rentals)
- Undertaking
- Photography
- Hotel and Tourist
- Miscellaneous

All employment and payroll figures shown for Retail, Wholesale and Services, have the following qualifications:

Employees. The figures shown cover the minimum number of paid employees during the year 1951.

Payroll. Is the total amount paid to all employees during the year 1951.

Manufacturing

Final figures were obtained from the General Review of Manufacturing Industries, 1951.

Net Value of Production. This value was computed by subtracting the cost of fuel and electricity and the cost of materials from the gross value of production.

Population

All figures were taken from 1951 Census Volume I--Population.

Language. Two separate inquiries on language were included in the 1951 Census of Canada. The first of these relates to what is termed in the census as "official language". This inquiry seeks to determine the number of persons who are able to speak one or both of the two official languages of Canada. It should be noted, however, that persons indicated in the tables of this report as speaking "English only" or "French only" may also speak other languages in addition to English or French.

Two breakdowns do not necessarily add up to any main total, since the "neither English nor French" group has not been shown.

Labour Force

All figures were taken from the 1951 Census Volumes IV and V--Labour Force.

Total Labour Force excluded a few persons seeking work who have never been employed.

Earnings Groups do not add up to total wage-earners due to "not stated" cases.

Housing

All figures were taken from the 1951 Census Volume III--Housing and Families.

All figures come from a 20 p.c. sample of dwellings. Because of sampling error, figures under 100 are indicated by dashes (--).

Figures for the Yukon and Northwest Territories were not available, and the Canada totals do not include these areas.

For Rented Households, Median Rent, and Owner-occupied with Mortgages, the figures cover non-farm dwellings only. A minus sign in front of a figure indicates "less than".

Agriculture

All figures were taken from the 1951 Census Volume VI--Agriculture.

Farm Population. All persons living in a dwelling situated on a farm as defined in the census were considered to be farm population, regardless of their occupation.

Value of Products Sold. Represents the value of sales of all farm products sold from the farm including products sold or exchanged, whether received by the farm operator or some other person. Crop insurance and Government payments received for hail damage, crop failure, etc. were reported as crop sales. Crop participation payments were similarly reported.

Part-time Farms include those with sales of farm products between \$250 and \$1,199 and (1) the operator reported that he worked 100 days or more off the farm; or (2) the operator reported the farm income less than his income from other sources.

Wages and Board paid Farm Labour. This item includes (a) the amount of wages paid in either cash or kind to hired farm labour (except the amount paid for housework and construction labour) (b) the value of house rent or room and board furnished to hired workers.
